

National Expert on Atmospheric air pollution of Working Group on development the
“National Strategy on environment protection for 2011-2020”

Terms of Reference

Background

In 2002 the National Environmental Action Plan of Turkmenistan was approved, which was conditioned by the necessity of compliance and implementation of commitments made by Turkmenistan in accordance with the Constitution of Turkmenistan, international agreements, and national legislation.

As a result of realization and received experience of NEAP was accepted a decision to develop the “National Strategy on environment protection for 2011-2020”.

The main outcome of the second National Action Program is to preserve the sustainable development trend in the country during 2011-2020, which implies the prioritization of environmental problems, development of solutions and an assessment of the social and economic reforms that are underway in the country. It also envisages increasing the capacity of the Ministry of Nature Protection of Turkmenistan in the field of environmental planning; and ensuring the compliance with national and international environmental obligations of Turkmenistan, creating more clarity for its enforcement.

A Working Group is to be established for:

- Identification of the Strategic Directions and Relevant Specific Activities of the Ministry of Nature Protection and Natural Resources of Turkmenistan for the next five years period
- Elaboration of the Ministry Guideline for Planning Activities (within the frame of its competence) aimed at efficient and timely achievement of the Goal and objectives of the Ministry at the national and international levels.

The draft of this “National Strategy” will be present by Working Group to the Ministry of Nature Protection of Turkmenistan. The Ministry of Nature Protection then will finalize this document and send for reviewing to all concerned organizations: Ministry of the Economy and Development, Ministry of Health and Medical Industry, Ministry of Oil&Gas, Ministry of Energy and Industry, State Service “Turkmenstandard”, and others. Then this “National Strategy” with the corrections made by stakeholder’s organizations will be present to the Cabinet of Ministers of Turkmenistan, and after it approval can be implemented by Ministry of Nature Protection.
